Auckland, NZ | akhilmathew2207@gmail.com | LinkedIn | GitHub | (+64) 223755839

PROFILE SUMMARY

Master of Information Technology student at the University of Auckland (graduating 2026) with internship experience delivering REST APIs, Windows applications, and full-stack web projects. Strong foundation in OOP, debugging, load testing, and working in team environments with stakeholders. Comfortable working across the software development lifecycle, adaptable in fast-paced settings, and bring a strong problem-solving, critical-thinking, and team-first approach.

SKILLS

Programming Languages: Python, Java, C++, Object Pascal, SQL, JavaScript
Tools/ Frameworks: React, Delphi, Postman, GitHub, Tableau, Power BI, Figma, Excel, SAP Build, Ghidra, VS code
Databases: MySQL, MongoDB, Firebase
Strengths: Communication, Teamwork, Leadership, Critical thinking, Documentation, Problem-solving

WORK EXPERIENCE

SOFTWARE DEVELOPER INTERN **Aug 2024 – Nov 2024**
Nanda Group of Companies

- Designed and developed a **responsive website** using **Figma, React, and TypeScript**, improving UI/UX and Integrated **dynamic content** using **Firebase**, improving data retrieval and overall site performance.
- Collaborated with cross-functional stakeholders and an 8-member team in an Agile environment to deliver the project.
- Took ownership of delivery from design handoff through development, testing, and final QA, incorporating feedback quickly and meeting deadlines without compromising quality.
- Automated customer support ticket handling by making a **form-based ticketing** workflow using Google Forms and Excel sheet; sending personalized, priority-based responses to improve response consistency and turnaround time.
- The resulted solution was set live and used by more than 100 customers in our company and was appreciated as an effective solution without extra cost involved.

SOFTWARE DEVELOPER INTERN **Jan 2024 – Apr 2024**
Novatech Software's Pvt. Ltd

- Designed and developed vending machine application (beverage dispensing), applied **object-oriented programming** principles, enhancing my skills in application design, system architecture, and project management.
- Developed **REST API endpoints** for a library management system, supporting library workflows with **CRUD** operations and role-based access control while reducing redundancy.
- Performed **debugging** and **load testing** using postman to improve API reliability and performance under varying loads.
- Gained experience working on legacy software, and code documentation practices.
- Worked in an **Agile** sprint-based development setup, collaborating closely with the team, adapting to changing requirements.

TRAINEE ENGINEER INTERN **Apr 2024 – July 2024**
IQ General Solutions Pvt. Ltd.

- Developed an interactive **Tableau** sales dashboard analyzing four years of hardware sales data to uncover trends and support decision-making.
- Focused on clear UI for stakeholders, so insights were easy to interpret and act on.

SALES ASSISTANT **Sept 2025 – Present**
Tarocash, Auckland

- Provided frontline support to 50+ customers per shift, while **coordinating** with a 20+ member team to achieve sales and operational **KPIs**.
- Independently run day-to-day store operations during solo shifts, managing customer service, sales, visual merchandising, cash handling, and stock tasks, with support from the wider team via phone/email as needed.

ACADEMIC & PROFESSIONAL PROJECTS

Library Workflow Management System Using REST API and MySQL | Link
Developed a System facilitating book addition, categorization, and user authentication. Implemented features for borrow/return, search with filter, book detail update, due date notifications, and access control to the system according to the authorization roles. Implemented transaction logging system to enhance library efficiency and user experience.

Nanda Group Corporate Website | Link
Developed the company website using React and TypeScript, enhancing user experience and using Firebase storage for optimizing performance, resulting in increased customer engagement and reach through the new website.

Kalah Game using Object Oriented Programming Techniques in Java (coursework**)**
Architected the game engine around 6+ cohesive domain classes, modelling the 12 houses and 2 stores with following SOLID/clean-code practices to maintain high cohesion and low coupling and used Command and Memento design pattern to isolate game actions and state snapshots so features like undo and save/load could be introduced with minimal impact on existing classes.

Vending Machine Application Using Object Oriented Programming Techniques in Object Pascal | Link
Developed a Windows-based application for beverage dispensing, including features for inventory management, utilization tracking, financial calculations, and daily sales reporting. Followed OOP and focused on making the code readable and maintainable along with proper documentation.

Lawsuits Website Design | Link
Designed a user-friendly user interface for easy navigation and implemented responsive web design principles to optimize accessibility across various devices and screen sizes.

EDUCATION

Master Of Information Technology **July 2025 – Present**
University Of Auckland

B. Tech Computer Science Engineering **Sept 2020 – July 2024**
G. H. Raisoni College of Engineering

HONOURS & AWARDS

Smart India Hackathon Finalist 2023-24
Collaborated with a team of 5 to develop a centralized platform for legal service providers and users, earning recognition as finalists for innovative problem-solving and effective execution. The project envisioned increased access to affordable and quality legal services for citizens, empowering underserved communities, and streamlining legal service delivery.

EXTRA-CURRICULAR / LEADERSHIP

AUSA Buddy Leader (2026)
Supported international students to settle into Auckland and navigate key admin processes like banking, IRD, etc. Served as a first point of contact during the Semester and helped run programme events to build an inclusive student community.

Student Representative Council Member (2022–23)
As a member of the Apex Student Committee, I collaborated with a team of 30 members to organize and execute various events within the college. Our responsibilities included event planning, coordination, and ensuring smooth operations.

Campaigning Head, CSE Forum (2022–23)
Led a team of 10, to actively campaign for events organized by the forum. We strategized, coordinated promotional activities, and engaged the student community to ensure maximum participation.
